Active Intelligence

Connecting Surgeons and Patients in New Ways

Exactech is defining a new level of partnership in patient care with Active Intelligence(R), a powerful platform of technologies that helps surgeons engage with patients and peers, solve challenges with predictive tools and optimize the way they perform joint replacement surgery.

Who We Are

Exactech was founded in 1985 by Dr. Bill Petty, an orthopaedic surgeon, Dr. Gary Miller, a biomedical engineer and Betty Petty. Our purpose then remains the same today: to improve the quality of life for individuals by maintaining their activity and independence. We do this through innovative ideas, high quality products, education and commitment to service. We've leveraged the company's founding principles to look at clinical challenges through the eyes of a surgeon. It's all about working together, focusing on surgeons' needs and then engineering innovative solutions that can help joint replacement patients regain their mobility.
